Challenges

Lack of awareness and understanding.

One of the initial challenges is a general lack of awareness and understanding of ORCID among researchers, faculty, and administrators in Ukrainian universities. Many individuals may not be familiar with the benefits of ORCID or the integration process. Conducting awareness campaigns, training sessions, and workshops can help address this challenge.

Collaboration with IT department and engagement with library or research support staff

Data migration and synchronization.

Ukrainian universities often have existing databases and systems that store research and scholarly information. Integrating these systems with ORCID requires data migration and synchronization, which can be a complex task.

Adoption and engagement

Encouraging researchers, faculty, and students to adopt and actively engage with ORCID can be challenging. Some individuals may perceive the integration process as an additional burden or may not fully understand the benefits of ORCID. Implementing educational initiatives, highlighting the advantages of ORCID, and showcasing success stories can help drive adoption and engagement.
